OSTEONEKS

FEATURES OF THE SYSTEM

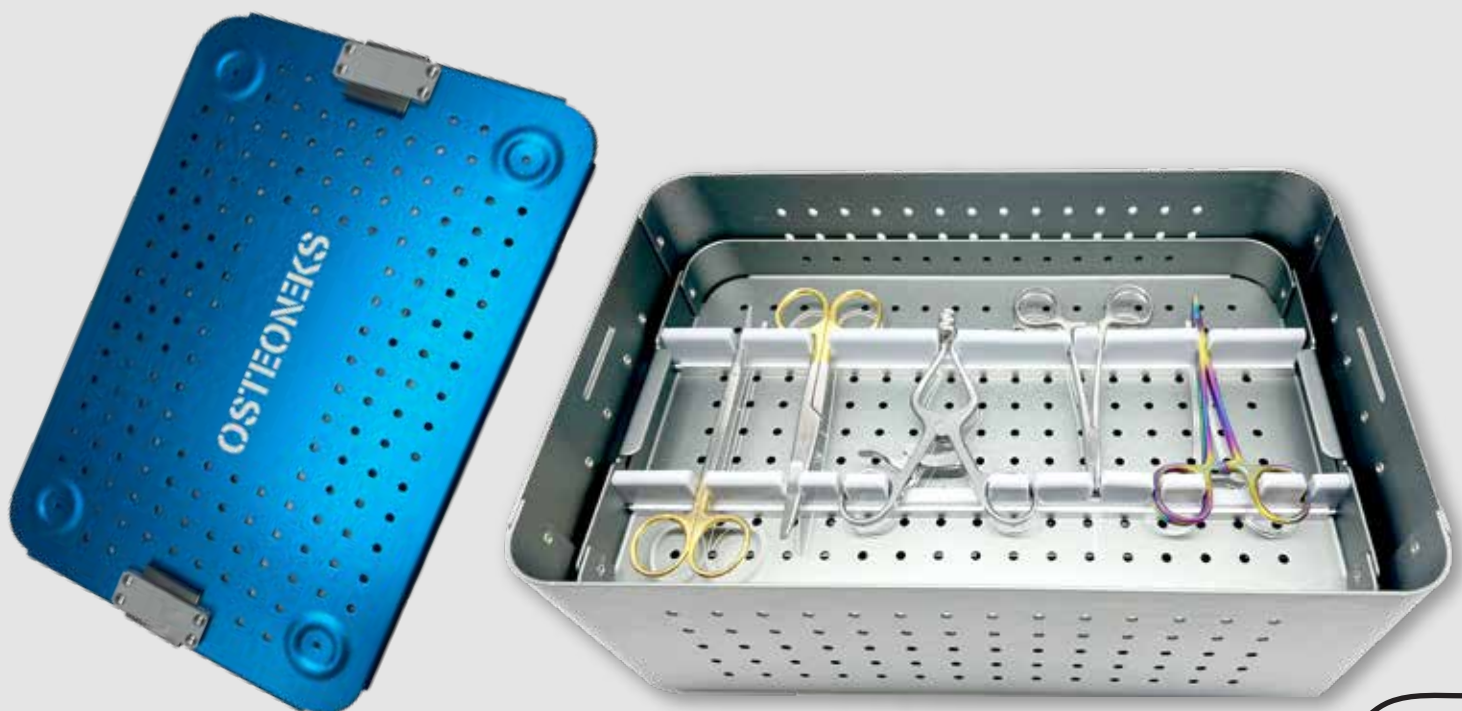

- ✦ Sterilization stability
- ✦ Instruments protection against damage
- ✦ High quality of sterilization thanks to double filter
- ✦ All dimensions fulfil DIN 58952
- ✦ Utmost flexibility in the preparation of the surgical instruments

This surgery box comprises with a unique system made with 3 levels, where the instruments placement allows to operate directly from it without the need of taking them out, one by one, saving precious time for the surgical team.

The container counts with a modern sterilization filter that adds greatly in efficiency at the time of sterilizing not only the instrument that the box contains but also any other extras that may be added.

The system has been designed for all types of surgical interventions of small and medium fragments.

NOTE: The box does not include inserter for Kirschner wires.
